

# SERVICE PRODUCT BRIEF PRODUCT SITE TRANSFERS

Verify's **Product Site Transfer** services are indispensable when customers need to manage the complete relocation of product manufacture from one (or multiple global) locations to new site locations.

Verify compliance assurance, engineering, manufacturing and supply chain management talent is engaged to act as the liaison between sites and ensure effective transfer of requirements, knowledge and production within the required timeframe. Compliance, capability, capacity, and readiness are measured continuously. High level project management skills are essential.

# PRODUCT SITE TRANSFERS

Based on customer requirements, Product Site Transfer services draw upon the following core capabilities:

	<b>People</b>	Experienced high caliber engineering, manufacturing, supply chain, and project management resources are carefully selected to plan, execute, and accurately report to completion.
	<b>Process</b>	Industry proven standard work packages including best practice processes, checklists and forms.
	<b>Platform</b>	Online Supplier Performance Platform provides real-time status, results, and performance analytics.
	<b>Facilities</b>	Verify inspection facilities can be established to provide contingency and operate an interim basis.

## Best Practice Product Site Transfer Steps

- Verify and Customer review product site transfer requirements – for either single or multiple suppliers
- Verify identifies qualified and proven product site transfer specialists – available on-demand to support the required schedule
- Verify engages with supplier and customer to either develop or update the product site transfer plan
- Customer and supplier approve the plan as necessary
- Verify executes to plan, captures current state, provides both real-time and scheduled reporting
- Confirmation of successful transfer
- Verify may continue with Supplier Management service post transfer based on customer and program requirements
