

SERVICE PRODUCT BRIEF FIRST ARTICLE INSPECTION

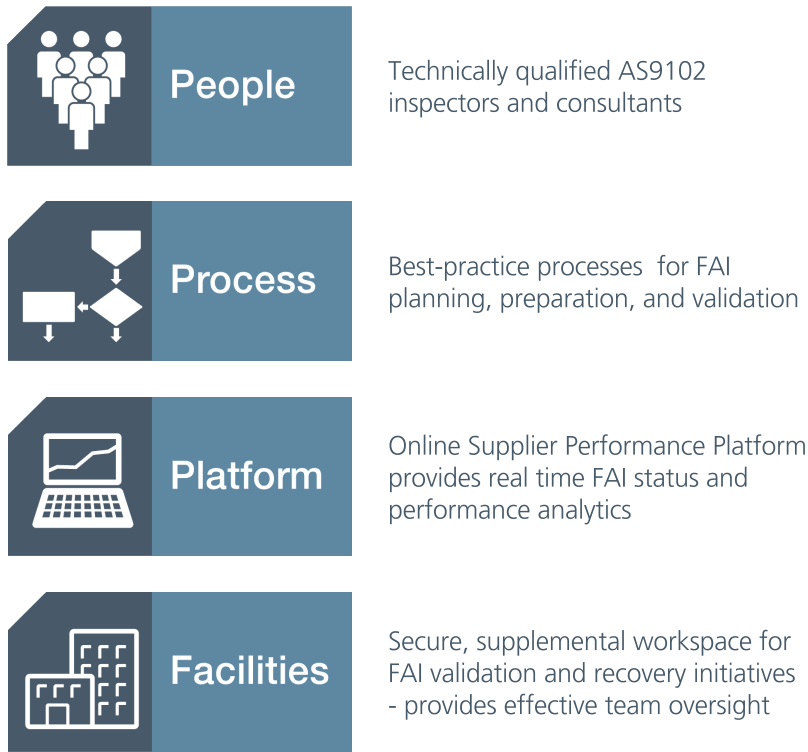

Verify's broad range of **First Article Inspection (FAI)** consulting, training, and managed services help customers and suppliers recover delinquent FAIs, keep pace with new product FAIs, and manage effective FAI programs.

FAIs occur at the Qualification & Pre-production Planning phase of the **Supplier Performance Management (SPM)** lifecycle. Verify's services plan for, prepare, and/or validate AS9102 First Article Inspection Reports (FAIRs) to ensure production processes produce parts that meet requirements.

FIRST ARTICLE INSPECTION

Based on customer requirements, Verify implements FAI services drawing upon core capabilities.

Best Practice Verify FAI Services

1. Consulting

- Assess, develop and deploy best-practice FAI processes at customers and suppliers

2. Training

- Teach AS9102 purpose and requirements for customers and suppliers

3. Planning

- Address all activities to be performed throughout the FAI process, identify areas of responsibility and prepare forms 1,2,3

4. Validation

- Manage FAI validation programs that review and approve supplier FAIs on behalf of customers
