# SERVICE PRODUCT BRIEF
RECEIVING INSPECTION

Performed at the customer, a third-party, or Verify's facilities, **Receiving Inspection (RI)** examines purchased products to validate conformance to customer requirements prior to the next stage of the value stream. RI is utilized to minimize risk when suppliers have performance issues or when further quality control is mandated.

From qualified resources to fully outsourced and managed facilities, Verify's best practice RI services will quarantine nonconforming product, initiate corrective action, and activate Supplier Recovery or Development efforts as required.

Supplier Performance Management Lifecycle

6 Performance Improvement
- Supplier Management
- Supplier Recovery & Development
- Supplier Funded Initiatives
- Corrective Action Management

1 Supplier Qualification & Selection
- Capability & Capacity Assessments
- Compliance Audits / Assessments

RECEIVING INSPECTION

Based on customer requirements, RI services drawing upon core capabilities.

People — Experienced project leaders and proven field resources qualified to consult, plan, and execute on all RI responsibilities

Process — Industry proven standard work packages

Platform — Online Supplier Performance Platform provides real time status and performance analytics

Facilities — Secure, outsourced Receiving Inspection facilities available on a temporary or permanent basis

Best Practice Receiving Inspection Deliverables

1. Established Program Infrastructure
- Best practice processes, state of the art facilities, embedded resources, focused on effectiveness, and continual improvement

2. Standard Reports and Analysis
- Reject rate trends, failure code analysis, escape trends,

and service turnaround schedule compliance

3. Containment
- At every stage of the value chain through to in-service product

4. Root Cause Corrective Action (RCCA) Management
- Initiated for every nonconformance to eliminate defect recurrence

4. Tooling and Tool Management
- Cost effective management of state of the art inspection tooling avoids large upfront CAPEX associated with traditional approach

Verify Delivers

Best practice RI services based on specific customer and industry requirements

Full range of specialist and certified inspections

Real time visibility, traceability, and performance metrics

Managed facilities and state of the art inspection tooling

Customer Benefits

Assuring product conformity and preventing any undeclared defects from entering the value stream

Driving supplier improvement through automated corrective actions

Can be Integrated with containment and sorting actions

Scalable and flexible based on supplier performance demands

Value Proposition

Global, scalable, and insightful solutions to recover, improve, and maintain optimum supply-chain performance.
