

SERVICE PRODUCT BRIEF CAPABILITY ASSESSMENTS

Verify's **Capability Assessment** services are a feasibility evaluation of the technical, physical, and competency limitations of a supplier to meet current and future contractual and operational requirements sustainably.

From single assessments to fully managed programs, Verify's qualified assessors and contract management specialists plan, measure, and report on contractual and operational performance capabilities. Capability Assessments allows the Verify customer to determine which suppliers have the systems in place to meet contractual and operational performance needs and provide a maturity scale and score to measure progress.

CAPABILITY ASSESSMENTS

Based on customer requirements, services draw upon the following core capabilities:

	People	Experienced and proven field resources qualified to plan, execute, report, and follow-up on all assessment responsibilities
	Process	Industry proven standard work packages including checklists and forms
	Platform	Online Supplier Performance Platform provides real-time status and performance analytics

Best Practice Maturity Scoring

- Maturity Level 1:** Supplier systems undefined and not capable
- Maturity Level 2:** Supplier systems defined and applied, but not 100% effective or not applied everywhere in the company
- Maturity Level 3:** Supplier systems defined, applied, and effective: repeated satisfactory performance capable - not yet predictable
- Maturity Level 4:** Supplier systems predictable: performance of proactive improvements towards planned targets, but not systematically on all processes, areas, and / or products
- Maturity Level 5:** Supplier systems optimized: best in class, continual improvement fully deployed, involving all stakeholders

Verify Delivers

Best practice capability assessment services based on specific customer requirements

Single assessments to fully managed programs

Assessors qualified based on contract, technology and product commodity

Real time visibility, traceability and performance metrics

Customer Benefits

Reliable supplier qualification and selection

Uncovering potential contractual, technical or operational risks that could impact business continuity

Assess supplier readiness for production demand changes

Establish supplier maturity score and measure progress

Value Proposition

Global, scalable, and insightful solutions to recover, improve, and maintain optimum supply-chain performance.
