

# SERVICE PRODUCT BRIEF

## SOURCE INSPECTION

Performed at the supplier's facility, Verify's **Source Inspection (SI)** services examine purchased products to validate conformance to customer requirements before the product ships. SI are deployed to assure compliance and mitigate risk when suppliers have performance issues or when products are complex, critical or have long lead times

From on-demand qualified resources to fully managed programs, Verify's best practice SI contains nonconforming product at the supplier site and facilitates supplier corrective action to prevent recurrence.

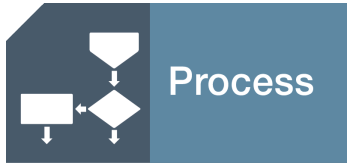

# SOURCE INSPECTION

Based on customer requirements, Source Inspection services draw upon the following core capabilities:

Experienced project leaders and proven field resources qualified to consult, plan, and execute on all source inspection activities

Industry proven standard work packages

Online Supplier Performance Platform provides real-time status and performance analytics

## Best Practice Source Inspection Deliverables

### 1. Established Program Infrastructure

- Managing customer flow down requirements, facilitating supplier cooperation, access to all work instructions and forms

### 2. Qualified On-demand Resources

- Available local to the supplier site

### 3. Supplier Performance Platform (SPP)

- Real time access to inspection status, results and reports.

### 4. Inspection Records

- Completed for each inspection event and available online using SPP

### 5. Standard Reports and Analysis

- Reject rate trends, failure code analysis, escape trends, service turnaround schedule compliance

### 6. Root Cause Corrective Action (RCCA) Management

- RCCA can be initiated for every non-conformance and verified for effectiveness to prevent defect recurrence

### 7. Supplier Funded Initiatives (SFI)

- Available when warranted to pass the cost of nonperformance back to the supplier

## Verify Delivers

Best practice SI services based on specific customer and industry requirements

Specialist 8130-3 and 8130-9 DAR conformity inspections

High reliability, space class microelectronic inspections

Non Destructive Testing (NDT), independent test witness and pre-shipment validations

## Customer Benefits

Assuring product conformity and preventing any undeclared defects from entering the supply chain
